ATHEROSCLEROSIS[a]

Editor and Conference Chairman

K. T. LEE

Organizing Committee

ROBERT W. WISSLER,
WILBUR A. THOMAS,
FUJIO NUMANO,
GARDNER C. MCMILLAN, and
K. T. LEE

CONTENTS

Introductory Remarks. *By* K. T. LEE ix

Part I. Overview
Chair: M. DARIA HAUST

Nature and Definitions of Atherosclerosis. *By* GARDNER C. MCMILLAN 1

Discussion Paper: Macrophage Foam Cells in the Coronary Artery Intima of Human Infants. *By* HERBERT C. STARY 5

Part II. Pathogenesis of Human and Experimental Atherosclerosis
Chair: JACK P. STRONG

A New Way to Look at Atherosclerotic Involvement of the Artery Wall and the Functional Effects. *By* ROBERT W. WISSLER, DRAGOSLAVA VESSELINOVITCH, HARRY R. DAVIS, PAUL HENRI LAMBERT, and MANUELA BEKERMEIER 9

Discussion Paper: Effects of Synthetic Glycosides on Cholesterol Absorption. *By* M. RENE MALINOW 23

The Role of Individual Differences in Lipoprotein, Artery Wall, Gender, and Behavioral Responses in the Development of Atherosclerosis. *By* THOMAS B. CLARKSON, JAY R. KAPLAN, and MICHAEL R. ADAMS 28

Discussion Paper: Lipoprotein Responses and Artery Wall Responses as Factors Affecting the Development of Atherosclerosis. *By* FRED A. KUMMEROW 46

[a]The papers in this volume were presented at the Saratoga Springs Conference on Atherosclerosis, which was held on August 8–12, 1984, sponsored by the Department of Pathology at Albany Medical College.

Part III. Matrix

Chair: HERBERT C. STARY

Proteoglycan Structure and Function as Related to Atherogenesis. *By* WILLIAM D. WAGNER 52

Discussion Paper: Proteoglycans and Potential Mechanisms Related to Atherosclerosis. *By* GERALD S. BERENSON, BHANDARU RADHAKRISHNAMURTHY, SATHANUR R. SRINIVASAN, PARAKAT VIJAYAGOPAL, and EDWARD R. DALFERES 69

Part IV. Macrophages

Chair: HENRY C. MCGILL

Foam Cells and Atherogenesis. *By* STANLEY D. FOWLER, EUGENE P. MAYER, and PHILLIP GREENSPAN 79

Discussion Paper: Foam Cell Characteristics in Coronary Arteries and Aortas of White Carneau Pigeons with Moderate Hypercholesterolemia. *By* JON C. LEWIS, RICHARD G. TAYLOR, and W. GRAY JEROME 91

Role of Macrophages in Regression of Atherosclerosis. *By* ASSAAD S. DAOUD, KATHERINE E. FRITZ, JOHN JARMOLYCH, and ADRIENNE S. FRANK 101

Discussion Paper: Atherosclerosis as an Inflammatory Process: The Roles of the Monocyte-Macrophage. *By* COLIN J. SCHWARTZ, ANTHONY J. VALENTE, EUGENE A. SPRAGUE, JIM L. KELLEY, C. ALAN SUENRAM, and MARIUS M. ROZEK 115

Part V. Prostaglandins; Cyclic Nucleotides

Chair: GERALD S. BERENSON

The Problems and the Promise of Prostaglandin Influences in Atherosclerosis. *By* S. MONCADA and M. W. RADOMSKI 121

Discussion Paper: Pharmacological Analysis of Factors Influencing Platelet Aggregation in Stenosed Coronary Arteries of Dogs. *By* JAMES W. AIKEN 131

Prostacyclin and Variant Angina. *By* FUJIO NUMANO, SHUZO NOMURA, TADANORI AIZAWA, JUNICHI FUJII, and MICHIYOSHI YAJIMA 135

Part VI. Thrombotic Process

Chair: SEYMOUR GLAGOV

Thrombosis and Atherogenesis—The Chicken and the Egg (Contribution of Platelets in Atherogenesis). *By* SEAN MOORE 146

Discussion Paper: Thrombosis and Atherosclerosis—Some Unresolved Problems. *By* M. DARIA HAUST 154

Factors Controlling Thrombus Formation on Arterial Lesions. *By* H. R. BAUMGARTNER and K. S. SAKARIASSEN 162

Part VII. Lipoprotein Receptors

Chair: PETER M. ALAUPOVIC

The Receptor Model for Transport of Cholesterol in Plasma. *By* MICHAEL S. BROWN and JOSEPH L. GOLDSTEIN 178

Discussion Paper: Lipoproteins Containing Apo B Extracted from Human Aortas: Structure and Function. *By* HENRY F. HOFF and RICHARD E. MORTON 183

Mechanisms Involved in the Uptake and Degradation of Low Density Lipoprotein by the Artery Wall *in Vivo*. *By* DANIEL STEINBERG, RAY C. PITTMAN, and THOMAS E. CAREW 195

Discussion Paper: Some Speculations on the Deposition of Cholesterol in Aortic Lesions of Familial Hypercholesterolemia. *By* DONALD M. SMALL 207

Part VIII. Lipoproteins
Chair: PAUL S. ROHEIM

Lipoproteins of Special Significance in Atherosclerosis: Insights Provided by Studies of Type III Hyperlipoproteinemia. *By* ROBERT W. MAHLEY, THOMAS L. INNERARITY, STANLEY C. RALL, JR., and KARL H. WEISGRABER 209

Discussion Paper: Synthesis of Apolipoprotein E by Peripheral Tissues: Potential Functions in Reverse Cholesterol Transport and Cellular Cholesterol Metabolism. *By* DAVID L. WILLIAMS, PAUL A. DAWSON, THOMAS C. NEWMAN, and LAWRENCE L. RUDEL 222

Discussion Paper: The Association of Serum Lipids, Lipoproteins, and Apolipoproteins with Coronary Artery Disease Assessed by Coronary Arteriography. *By* HERBERT K. NAITO 230

Expression of LDL Receptor Binding Determinants in Very Low Density Lipoproteins. *By* WILLIAM A. BRADLEY, ANTONIO M. GOTTO, JR., and SANDRA H. GIANTURCO 239

Discussion Paper: LDL Heterogeneity and Atherosclerosis in Nonhuman Primates. *By* LAWRENCE L. RUDEL, M. GENE BOND, and BILLY C. BULLOCK 248

Part IX. Growth Factors
Chair: COLIN J. SCHWARTZ

Platelets, Macrophages, Endothelium, and Growth Factors: Their Effects upon Cells and their Possible Roles in Atherogenesis. *By* RUSSELL ROSS, DANIEL F. BOWEN-POPE, and ELAINE W. RAINES 254

Studies on Cell Proliferation and Mevalonic Acid Metabolism in Cultured Human Fibroblasts. *By* LARRY D. WITTE, KATHY P. FAIRBANKS, VERONIQUE BARBU, and DEWITT S. GOODMAN 261

Part X. Endothelial Cells
Chair: ABEL L. ROBERTSON

Atherogenic Regulation by Heparin-like Molecules. *By* ROBERT D. ROSENBERG, CHRISTOPHER REILLY, and LINDA FRITZE 270

Physiologic Functions of Normal Endothelial Cells. *By* ERIC A. JAFFE 279

Part XI. Cell Population Kinetics

Chair: JACK C. GEER

Kinetics of Atherosclerosis: A Stem Cell Model. *By* STEPHEN M. SCHWARTZ, MICHAEL R. REIDY, and ALEXANDER CLOWES 292

Cell Population Kinetics in Atherogenesis: Cell Births and Losses in Intimal Cell Mass-Derived Lesions in the Abdominal Aorta of Swine. *By* W. A. THOMAS, K. T. LEE, and D. N. KIM 305

Part XII. New Directions

Chair: K. T. LEE

Summary and New Directions. *By* ROBERT W. WISSLER 316

Cellular Mechanisms in Atherosclerosis: Theories and Therapies. *By* STEPHEN M. SCHWARTZ 320

Some Future Directions for Research on Atherogenesis. *By* DANIEL STEINBERG 322

New Directions in Atherosclerosis Research. *By* GARDNER C. MCMILLAN 324
